## Networking CISCO Academy

## **Certificate of Course Completion**

## Jonathan Natannael Zefanya

has successfully achieved student level credential for completing the Ethical Hacker course.

The student was able to proficiently:

- Explain the importance of methodological ethical hacking and penetration testing.
- Create penetration testing preliminary documents.
- · Perform information gathering and vulnerability scanning
- · Explain how social engineering attacks succeed.
- Explain how to exploit wired and wireless network vulnerabilities.

July 05, 2024

- · Explain how to exploit application-based vulnerabilities.
- Explain how to exploit cloud, mobile, and IoT security vulnerabilities.
- Explain how to perform post-exploitation activities.
- · Create a penetration testing report.
- · Classify pentesting tools by use case.

Laura Quintana

Vice President and General Manager Cisco Networking Academy

100%

You've scored 100%.

Congratulations, you have passed the test!

| Here is how you performed in each of the Learning Objectives and Skills associated with this assessment. |      |
|--|------|
| Create a penetration testing report.   | 100% |
| Explain the importance of methodological ethical hacking and penetration testing.                        | 100% |
| Explain how to exploit application-based vulnerabilities.  | 100% |
| Perform information gathering and vulnerability scanning activities.                                     | 100% |
| Create penetration testing preliminary documents.  | 100% |
| Explain how to exploit wired and wireless network vulnerabilities.                                       | 100% |
| Explain how social engineering attacks succeed.  | 100% |
| Explain how to exploit cloud, mobile, and IoT security vulnerabilities.                                  | 100% |
| Explain how to perform post-exploitation activities.   | 100% |
| Classify pentesting tools by use case.   | 100% |
